We Did

We need to understand *green skills* careers and training

We supported West of England Combined Authority on their *green skills provision mapping* which will be available on the West of England Combined Authority website and be used by career advisors to show the routes into retrofit careers, including the different entry points at different skill levels. This highlighted the provision in the local area and nationally

We need *more training* in retrofit, heat pumps and solar PV

We conducted a *Green Skills Sprint* project to determine the demand for training and identify existing and needed provision in the local area, including promoting the relevant available provision such as the SGS College Retrofit Bootcamps

We need support on how to *identify and secure training*

Business West launched in-person and online *Skills Clinics* to help businesses to identify their skills gaps and access ongoing support with our LSIP Skills Advisors to identify relevant training opportunities with partners throughout their skills journey

We need support with finding *funding and grant opportunities*

Construction Industry Training Board (CITB) have published a report identifying existing *training and funding* available that aligns with the LSIP priorities and findings. This is being promoted through their network and Business West signposting activities

What's next and how can I get involved?

Access our *Signposting Local Provision service*

Bespoke signposting to local provision based on your skills needs and business priorities

Speak to one of our *Skills Advisors*

Business Skills Advisors can work with you to identify your skills needs and signpost to training opportunities in the local area

Attend our *Meet the Expert events*

To shine the spotlight on different industries, highlight the scope of roles available and the skills needed for the sector

We couldn't deliver the LSIP and achieve this impact without our partners:
